Creative solutions for schools and academies

Organisation

**A Taste of Keystage Design** - This pseudo web page provides a flavour of our involvement in schools and academies. The varied selection of proposed and completed projects gives just a hint (or rather a Dash - to extend the metaphor!) of our capability and services. Keystage can organise and manufacture anything from a single **exclusive** product to a total **holistic** supply package. The in house project management teams have many years experience in the installation of teaching environments.

Our talented interior, product and furniture designers can produce detailed plans, elevations and photo-realistic visuals (see samples above) for client and end user presentations. We can coordinate the furniture and products within the architecture and arrive at the best, most efficient solution for any space. CNC based manufacturing facilities allow us to produce visually fluid, cost effective designs. For further information visit our web site [www.keystage.com](http://www.keystage.com) or contact our sales team on 01942 526 201.
